

Growing vegetables in a Potager garden

Leisure and Professional

Always wanted to grow vegetables, but don't want to dig over your whole garden or want to make an attractive and productive garden? Why not have a go at a potager garden?

This course looks at the planning and essential requirements for a Potager and how to grow 6 different vegetables. The day will include growing from seed, planting on, preparing an outdoor seed bed, planting out seedlings/modules and simple plant protection. This will be completed outdoors, weather permitting or undercover in one of our glass houses.
